

TELEPHONE EXCHANGE CARRIERS OF ALASKA

ACCESS SERVICES

9. Additional Engineering, Additional Labor and Miscellaneous Services

In this section, normally scheduled working hours are an employee's scheduled work period on any given business day which totals eight (8) hours. Any additional engineering, additional labor and/or miscellaneous services requested by the customer will be billed on a time and material basis by the Telephone Company.

9.1 Additional Engineering

Additional Engineering will be provided by the Telephone Company at the request of the customer when:

- A. A customer requests additional technical information after the Telephone Company has already provided the technical information normally included on the Design Layout Report (DLR) as set forth in 6.6.7 and 7.1.5 preceding.
- B. Additional engineering time is incurred by the Telephone Company to engineer a customer's request for a customized service as set forth in 7.1.2 preceding or for Telecommunication Priority Service Set forth in 9.3.3. (C)
(C)

The Telephone Company will notify the customer that additional engineering charges will apply before any additional engineering is undertaken.

9.2 Additional Labor

Additional labor is that labor requested by the customer on a given service and agreed to by the Telephone Company. The Telephone Company will notify the customer that additional labor charges will apply before any additional labor is undertaken. Additional labor charges apply to the services described in Sections 9.2.1 through 9.2.6.

9.2.1 Overtime Installation

Overtime installation is that Telephone Company installation effort outside of normally scheduled working hours.

9.2.2 Overtime Repair

Overtime repair is that Telephone Company maintenance effort performed outside of normally scheduled working hours.

TELEPHONE EXCHANGE CARRIERS OF ALASKA

ACCESS SERVICES

9. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)**9.2 Additional Labor (Cont'd)****9.2.3 Stand by**

Stand by includes all time in excess of one-half (1/2) hour during which Telephone Company personnel stand by to make installation acceptance tests or cooperative tests with a customer.

9.2.4 Testing and Maintenance with Other Telephone Companies

Additional labor charges apply for additional testing, maintenance or repair of facilities which connect to facilities of other telephone companies. This is in addition to the normal effort required to test, maintain or repair facilities provided solely by the Telephone Company.

9.2.5 Testing Services

Testing Services other than those described in other parts of this tariff will be provided on a time and material basis, if requested by the customer. Testing will be provided subject to the availability of equipment and qualified personnel.

9.2.6 Other Labor

Other labor is that additional labor incurred to accommodate a specific customer request that involves labor which is not covered by any other section of this tariff. It also covers additional labor necessary to meet customer requests as described in Section 5. Other Labor includes, but is not limited to, the provisioning to the customer, additional or duplicate reports or documents previously provided to the customer. Charges will be developed on a time and material basis.

TELEPHONE EXCHANGE CARRIERS OF ALASKA

ACCESS SERVICES

9. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)**9.3 Miscellaneous Services****9.3.1 Testing Services**

Testing Services offered under this section of the tariff are optional and will be billed to the customer on a time and material basis by the Telephone Company. Other testing services, as described in 6.6.8 preceding, are provided by the Telephone Company in association with Access Services and are furnished at no additional charge.

Testing Services are normally provided by Telephone Company personnel at Telephone Company locations. However, provisions are made in (B)(2) following for a customer to request Telephone Company personnel to perform testing services at the customer designated premises.

The offering of Testing Services under this section of the tariff is made subject to the availability of the necessary qualified personnel and test equipment at the various test locations mentioned in (A) and (B) following.

A. Switched Access Service

Testing Services for Switched Access are comprised of (a) tests which are performed during the installation of a Switched Access Service, i.e. Acceptance Tests, (b) tests which are performed after customer acceptance of such access services and which are without charge i.e., routine testing and (c) additional tests which are performed during or after customer acceptance of such access services and for which additional charges apply, i.e., Additional Cooperative Acceptance Tests and in-service tests.

ACCESS SERVICES

9. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

9.3 Miscellaneous Services

9.3.1 Testing Services (Cont'd)

A. Switched Access Service

Routine tests are those tests performed by the Telephone Company on a regular basis, as set forth in 6.6.8 preceding which are required to maintain Switched Access Service. Additional in-service tests may be done on an automatic basis (no Telephone Company or customer technicians involved), on a manual basis (Telephone company technicians(s) involved at Telephone Company office(s) and Telephone company or customer technicians(s) involved at the customer designated premises).

Testing services are ordered to the Dial Tone Office for FGA, to the access tandem or end office for FGB (wherever the FGB service is ordered) and to the end office for FGs C and D. Testing Services for Directory Assistance Service not routed through an access tandem is ordered to a Directory Assistance Location for each NPA.

1. Additional Cooperative Acceptance Testing

Additional Cooperative Acceptance Testing of Switched Access Service involves the Telephone Company provision of a technician at its office(s) and the customer provision of a technician at its premises, with suitable test equipment to perform the required tests.

Additional Cooperative Acceptance Tests may, for example, consist of the following tests:

- Impulse Noise
- Phase Jitter
- Signal to C-Notched Noise Ratio
- Intermodulation (Nonlinear) Distortion
- Frequency Shift (Offset)
- Envelope Delay Distortion
- Dial Pulse Percent Break

ACCESS SERVICES

9. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)**9.3 Miscellaneous Services****9.3.1 Testing Services (Cont'd)****A. Switched Access Service (Cont'd)****2. Additional Automatic Testing**

Additional Automatic Testing (AAT) of Switched Access Services (Feature Groups B, C and D), is a service where the customer provides remote office test lines and 105 test lines with associated responders or their functional equivalent. The customer may order, at additional charges, gain-slope and C-notched noise testing and may order the routine tests (1004 Hz loss, C-Message Noise and Balance) on an as needed or more than routine schedule.

The Telephone Company will provide an AAT report that lists the test results for each trunk tested. Trunk test failures requiring customer participation for trouble resolution will be provided to the customer on an as-occurs basis.

The Additional Tests, (i.e., gain slope, C-notched noise, 1004 Hz loss, C-message noise and balance) may be ordered by the customer at additional charges, 60 days prior to the start of the customer prescribed schedule. Additional tests will be provided on a time and material basis and billed to the customer by the Telephone Company.

3. Additional Manual Testing

Additional Manual Testing (AMT) of Switched Access Services (Feature Groups A, B, C and D and Directory Access Service not routed through an access tandem), is a service where the Telephone Company provided a technician at its office(s) and the Telephone Company or customer provides a technician at the customer designated premises, with suitable test equipment to perform the required tests. Such additional tests will normally consist of gain-slope and C-notched noise testing. However, the Telephone Company will conduct any additional tests which the IC may request.

The Telephone Company will provide an AMT report listing the test results for each trunk tested. Trunk test failures requiring customer participation for trouble resolution will be provided to the customer on a per occurrence basis.

The Additional Manual Tests may be ordered by the customer at additional charges, 60 days prior to the start of the testing schedule as mutually agreed to by the customer and the Telephone Company.

Additional Manual Tests will be provided on a time and material basis and billed to the customer by the Telephone Company.

The Telephone Company will provide assistance in performing specific tests requested by the customer.

1. Additional Cooperative Acceptance Testing

When a customer provides a technician at its premises or at an end user's premises, with suitable test equipment to perform the requested tests, the Telephone Company will provide a technician at its office for the purpose of conducting Additional Cooperative Acceptance Testing on Voice Grade Services. At the customer's request, the Telephone Company may provide a technician at the customer's premises or at the end user premises. These tests may, for example, consist of the following:

- Attenuation Distortion (i.e., frequency response)
- Intermodulation Distortion (i.e., harmonic distortion)
- Phase Jitter
- Impulse Noise
- Envelope Delay Distortion
- Echo Control
- Frequency Shift

9.3 Miscellaneous Services (Cont'd)

9.3.2 Maintenance of Service

- A. When a customer reports a trouble to the Telephone Company for clearance and no trouble is found in the Telephone Company's facilities, the customer shall be responsible for payment of a Maintenance of Service charge developed on a time and material basis for the period of time from when Telephone Company personnel are dispatched, at the request of the customer, to the customer designated premises to when the work is completed. Failure of Telephone Company personnel to find trouble in Telephone Company facilities will result in no charge if the trouble is actually in those facilities, but not discovered at the time.
- B. The customer shall be responsible for payment of a Maintenance of Service charge when the Telephone Company dispatches personnel to the customer designated premises, and the trouble is in equipment or communications systems provided by other than the Telephone Company or in detariffed CPE provided by the Telephone Company.

In either (A) or (B) preceding, no credit allowance will be applicable for the interruption involved if the Maintenance of Service Charge applies.

ACCESS SERVICES

9. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

9.3 Miscellaneous Services (Cont'd)

9.3.3 Telecommunications Service Priority - TSP

(N)

A. Priority installation and/or restoration of National Security Emergency Preparedness (NSEP) telecommunications service shall be provided in accordance with Part 64.401, Appendix A, of the Federal Communications Commission's (FCC's) Rules and Regulations.

In addition, TSP System service shall be provided in accordance with the guidelines set forth in "Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service Vendor Handbook" (NCSH 3-1-2) dated July 9, 1990, and "Telecommunication Service Priority System for National Security Emergency Preparedness Service User Manual" (NCSM 3-1-1).

The TSP System is a service, developed to meet the requirements of the Federal Government, as specified in the Service Vendor's Handbook and Service User's Manual which provides the regulatory, administrative and operational framework for the priority installation and/or restoration of NSEP telecommunications services. These include both Switched and Special Access Services. The TSP System applies only to NSEP telecommunications services, and requires and authorizes priority action by the Telephone Company providing such services.

9.3.3 Telecommunications Service Priority - TSP

(N)

A. (Cont'd)

For Switched Access Service, the TSP System's applicability is limited to those services which the Telephone Company can discretely identify for priority provisioning and/or restoration.

B. A Telecommunications Service Priority charge applies as set forth in 13.2.1 when a request to provide or change a Telecommunications Service Priority is received subsequent to the issuance of an Access Order to install the service.

A Telecommunications Service Priority charge does not apply when a Telecommunications Service Priority is discontinued or when ordered coincident with an Access Order to install or change service.

A Miscellaneous Service Order Charge as set forth in 13.2.1 will apply to Telecommunications Service Priority requests that are ordered subsequent to the initial installation of the associated access service.

9.3.3 Telecommunications Service Priority - TSP

(N)

B. (Cont'd)

Time and Materials charges may be applicable when provisioning or restoring Switched or Special Access Services with Telecommunications Service Priority and will be billed to the Customer by the Telephone Company, in accordance with Sections 9 and 13.5.*

A Telecommunications Service Priority monthly charge will apply as set forth in 13.2.2 to monitor and maintain database accuracy. (TSP Database Charge).

When the Customer requests an audit or a reconciliation of the Telephone Company's Telecommunications Service Priority records, a Miscellaneous Service Order charge as set forth in 13.2.1 will be applied. Additional Labor rate charges, if applicable, will be billed to the customer by the Telephone Company.

C. Charges for Special Access Service are shown in Section 13.3.1.

* Any company specific time and materials charges for TSP access not expressly shown in this tariff will be identified by the utility prior to commencement of service. All such access rates are subject to APUC approval.

(D)

9.3.4 Access to Intrastate Interexchange Carriers

(D) (N)

(C)

Local exchange carriers will provide equal access interconnection to intrastate interexchange carriers according to the procedures and schedules identified in this section. Presubscription and access rules applicable to end users are also explained in this section. Presubscription is the process by which end users may select and designate to the Telephone Company an IC to access, without an access code, for interexchange calls. Depending upon availability, the end user may presubscribe to different ICs for interstate and intrastate calls.

(C)

(L)

A. A local exchange carrier providing service to an exchange in a location identified in 3 AAC 52.355(a)(1) shall install and maintain plant, equipment, and facilities necessary to provide 2-PIC dialing in that exchange upon receipt of a bona fide request for interconnection.

(N)

B. If a local exchange carrier receives a bona fide request for interconnection in a location identified in 3 AAC 52.355(a) (1) in an exchange where interstate equal access is currently provided, it shall implement 2-PIC dialing in that exchange within 90 days after receipt of that request. Upon implementation of 2-PIC dialing, the access line or lines of each end user will be presubscribed to the incumbent carrier until the local exchange carrier receives authorization from the end user changing presubscription for an access line or lines to another certificated intrastate interexchange carrier.

ACCESS SERVICES

9. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

9.3 Miscellaneous Services (Cont'd)

9.3.4 Access to Intrastate Interexchange Carriers (Cont'd)

C. If a local exchange carrier desires a waiver of Part B. of this section, it must file a motion with APUC for that waiver within 30 days after receipt of the bona fide request for interconnection and include a schedule that states when 2-PIC dialing can be provided, the financial and technical basis for the waiver request, and a proposed public notice of the interim dialing arrangements. The proposed public notice must explain the 1-PIC dialing arrangements, list carriers available to provide both interstate and intrastate interexchange service, and describe the actions necessary to change a presubscribed access line to a different interstate interexchange carrier.

D. If a waiver of Part B. of this section is granted by the APUC then the local exchange carrier shall implement 1-PIC dialing for the period prior to 2-PIC implementation in accordance with the following rules:

- 1. Within 14 days after Commission approval of a waiver and associated public notice, the local exchange carrier shall mail copies of the approved notice to its end users. Each intrastate interexchange carrier listed on the notice will be billed by the local exchange carrier for an equal share of the cost of noticing.
- 2. The local exchange carrier shall implement 1-PIC dialing 45 days after Commission approval of the waiver.
- 3. Unless otherwise requested by the end user, upon conversion to 1-PIC, an end user's interstate carrier will automatic-ally become the end user's primary carrier processing both interstate and intrastate calls.

- a. New end users in 1-PIC areas must choose the same IC for both intrastate and interstate calls.

9.3.4 Access to Intrastate Interexchange Carriers (Cont'd)

E. If a local exchange carrier receives a bona fide request for interconnection in a location identified in 3 ACC 52. 355(a) (1) but in which interstate equal access is not currently available, it shall provide 2-PIC dialing at the same time and on the same schedule as required by the Federal Communications Commission for the implementation of interstate equal access. In this event, presubscription balloting for intrastate interexchange carriers will be conducted in coordination with balloting for interstate interexchange carriers.

1. At least 45 days in advance of the mailing of inter-state interexchange presubscription ballots, a local exchange carrier shall file with the APUC for review and approval a proposed intrastate interexchange presubscription ballot that lists the available intrastate interexchange carriers. The ballot must clearly state that an end user may select different interexchange carriers for intrastate and interstate interexchange services.
2. Pending the conversion to 2-PIC access, 1-plus and no-plus intrastate interexchange calls must be routed to the incumbent carrier. Other intrastate interexchange carriers shall obtain access through Feature Group A or Feature Group B without discount, or through the incumbent carrier's 2-PIC equal access tandem.

4. (Cont'd)

End users may designate that they do not want to presubscribe to any IC. The end user must arrange this designation by directly notifying the local exchange carrier's business office. This choice will require the end user to dial an access code (10XXX) for all interstate or intrastate calls. (C) (C) (C)

After the end user's initial selection of a predesignated IC or the designation that they do not want to presubscribe to any IC, for any change in selection after conversion to Equal Access in the serving end office, a nonrecurring charge, as set forth in 13.2.4 following applies.

5. End users not responding to the initial notification will be sent a second notification for the selection of a predesignated IC no earlier than 40 days prior to or no later than 90 days after the conversion to Equal Access in a serving end office. This second notification will indicate the primary IC that has been assigned to them if they fail to respond to the second notification. (C)

After the allocation process has been completed, end users assigned to an IC via the allocation process may change their IC one time within six months after conversion to Equal Access in the serving end office at no charge.

Following the six month period after conversion to Equal Access for any change in selection, a nonrecurring charge as set forth in 13.2.4 following, applies.

9.3 Miscellaneous Services (Cont'd) (D) (N)

9.3.4 Access to Intrastate Interexchange Carriers (Cont'd)

F. (Cont'd) (C)

Only one interstate IC and one intrastate IC may be selected for each individual line, (C)
or lines terminating in the same hunt group. (C)

In an area where waiver of 2-PIC requirements has been granted, the provisions of (N)
Section 9.3.4(D) apply. (N)

Subsequent to the installation of Telephone Exchange Service and after the end user's (C)
initial selection of predesignated IC(s), for any change in selection, a nonrecurring (C)
charge, as set forth in 13.2.4 following, applies.

G. If the new end user fails to designate the ICs as its predesignated ICs prior to the date (C)
of installation of Telephone Exchange Service, the Telephone Company will (1) (C)
allocate the end user to ICs based upon current presubscription ratios, or (2) require (C)
the end user to dial an access code (10XXX) for all intrastate calls. The end user will (C)
be notified which option will be applied if they fail to presubscribe to ICs. An allocated
end user may designate another, or initial, IC as its predesignated IC one time at no
charge, if it is requested within six months after the installation of Telephone Exchange
Service.

For any change in selection after six months from the installation of Telephone
Exchange Service, a nonrecurring charge, as set forth in 13.2.4 following applies.

9.3.4 Access to Intrastate Interexchange Carriers (Cont'd)

H. If an IC elects to discontinue its Feature Group D Service offering prior to or within 2 years of the conversion, the IC will notify the local exchange carrier of the cancellation. The IC will also notify all end users which selected them that they are cancelling their service and that they should contact the Telephone Company to select a new primary IC. The IC will also inform the end user that it will pay the presubscription change charge. The cancelling IC will then be billed by the local exchange carrier the appropriate charge for each end user for a period of two years from the discontinuance of Feature Group D service.

I. Customer Notice of Access Options and Presubscription

1. For a period of three years after a local exchange telephone carrier initially provides 2-PIC dialing, it must annually include in its periodic billings or in a separate mailing a notice to end users listing available intrastate interexchange carriers and explaining the actions that must be taken to change carriers and the cost of making the change. Each intrastate interexchange carrier listed on the notice will be billed by the local exchange carrier for an equal share of the cost of noticing.

2. A local exchange carrier may not reassign an end user's access line or lines to a different intrastate carrier unless either the end user has signed a written request for the change or the local exchange carrier has verifiable direct contact with the end user. A copy of the written request will suffice as a basis for reassigning an end user, so long as the LEC is immediately provided with the original written request in the event of a disputed reassignment. 9.3.5 Blocking Service

A. 900 Blocking Service

The Telephone Company will provide 900 Blocking Service to customers who obtain intrastate Feature Group A Switched Access service under this tariff. This service is only provided at appropriately equipped end offices. Those offices providing 900 Blocking Service are identified in NATIONAL EXCHANGE CARRIERS ASSOCIATION, INC. TARIFF F.C.C. NO. 4.

On each line for which 900 Blocking Service is ordered, the Telephone Company will block all direct dialed calls placed to a 900 number. When capable, the Telephone Company will route the blocked calls to a recorded message.

900 Blocking Service is provided free of charge to subscribers. However, when a subscriber requests to end the 900 Blocking Service, the Miscellaneous Service Order charge will apply. The charge does not apply when blocking is removed from a Feature Group A Switched Access line at the same time it is disconnected.
